

Every cashier, fluent in your produce codes.

PLUed trains cashiers until they ring produce from memory. Every standard code is built in, and it can carry your store's own.

In English and Spanish. Free for your shoppers.

PLUed plued.app/store

What PLUed is.

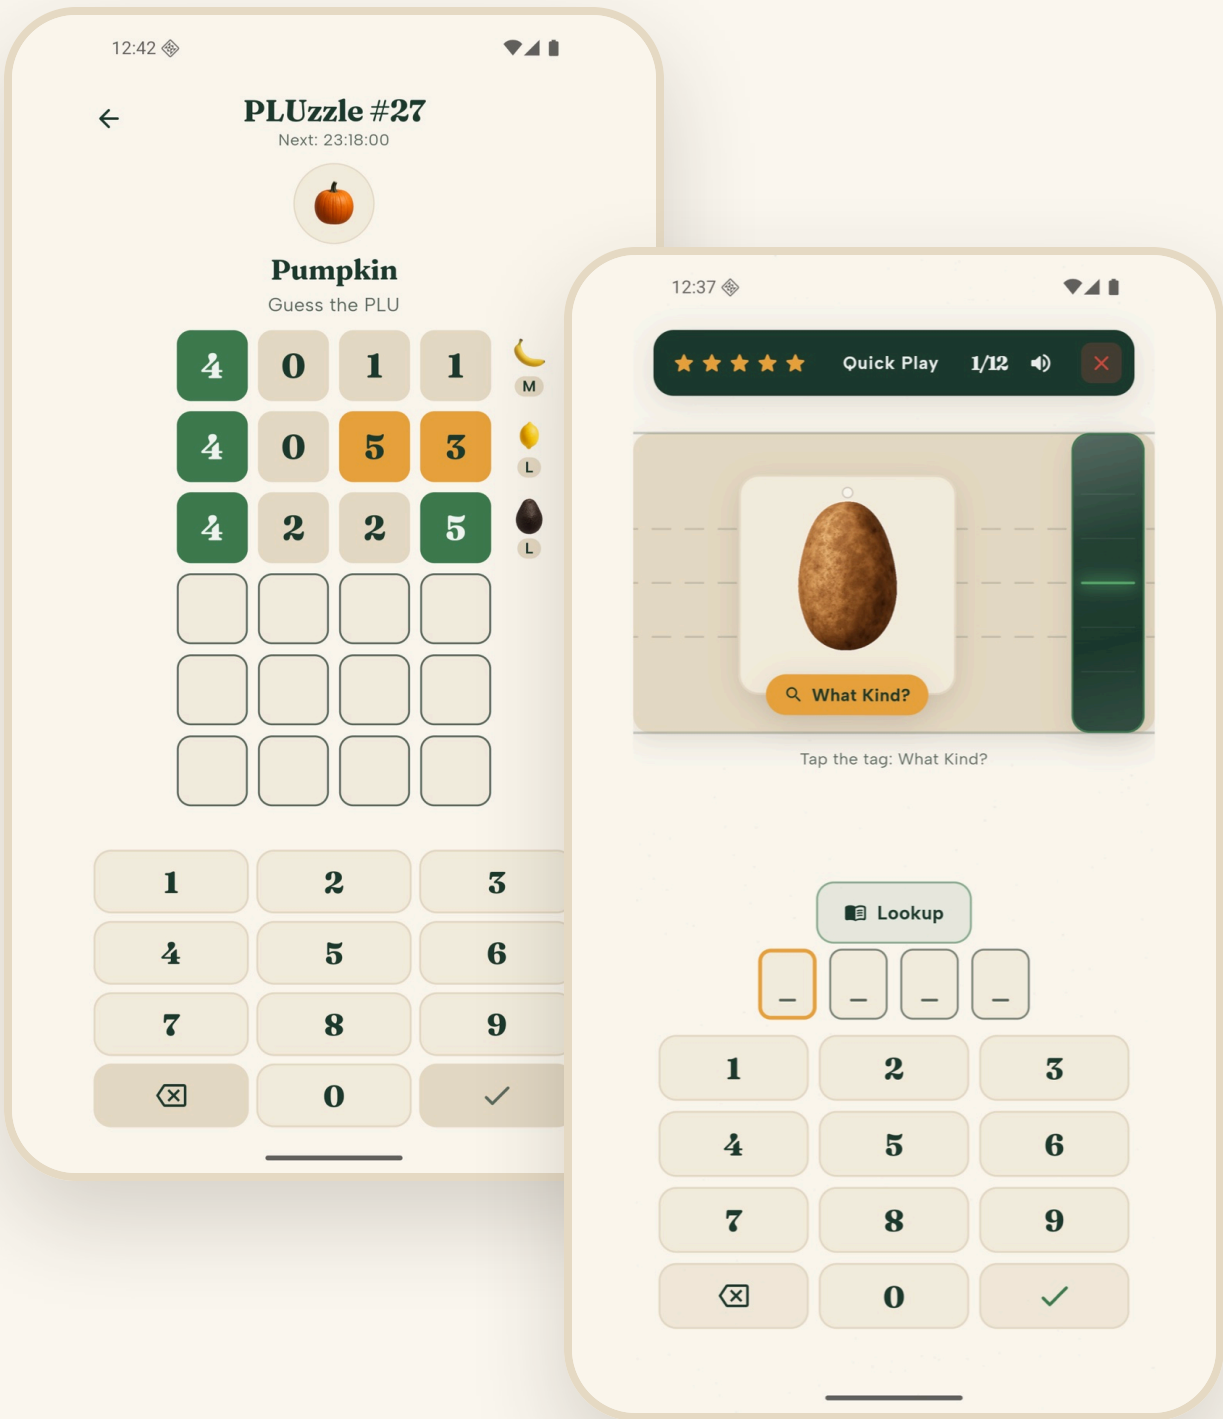

An app for phones and tablets that teaches cashiers the produce codes they key in at the register, and keeps them practicing a few minutes a day.

1,087 produce items Every standard code, each with its picture, its sizes and its region.

Your own codes too Add your store's custom codes: one at a time in the app, or all at once with a free Store Pack.

Three ways to practice Flashcards, a timed belt game, and ten levels that start with the most common items.

PLUzzle, every day A free daily puzzle: guess the produce code in six tries. It gives cashiers a reason to open the app each day. Try today's: plued.app/play

How PLUed teaches a code.

Typed from memory

Retrieval practice

Cashiers type each code, the way they will at the register. There is no list to pick from.

Missed codes come back sooner

Spaced repetition

A code they know waits longer. Each cashier's practice follows what that cashier has learned.

The most common items first

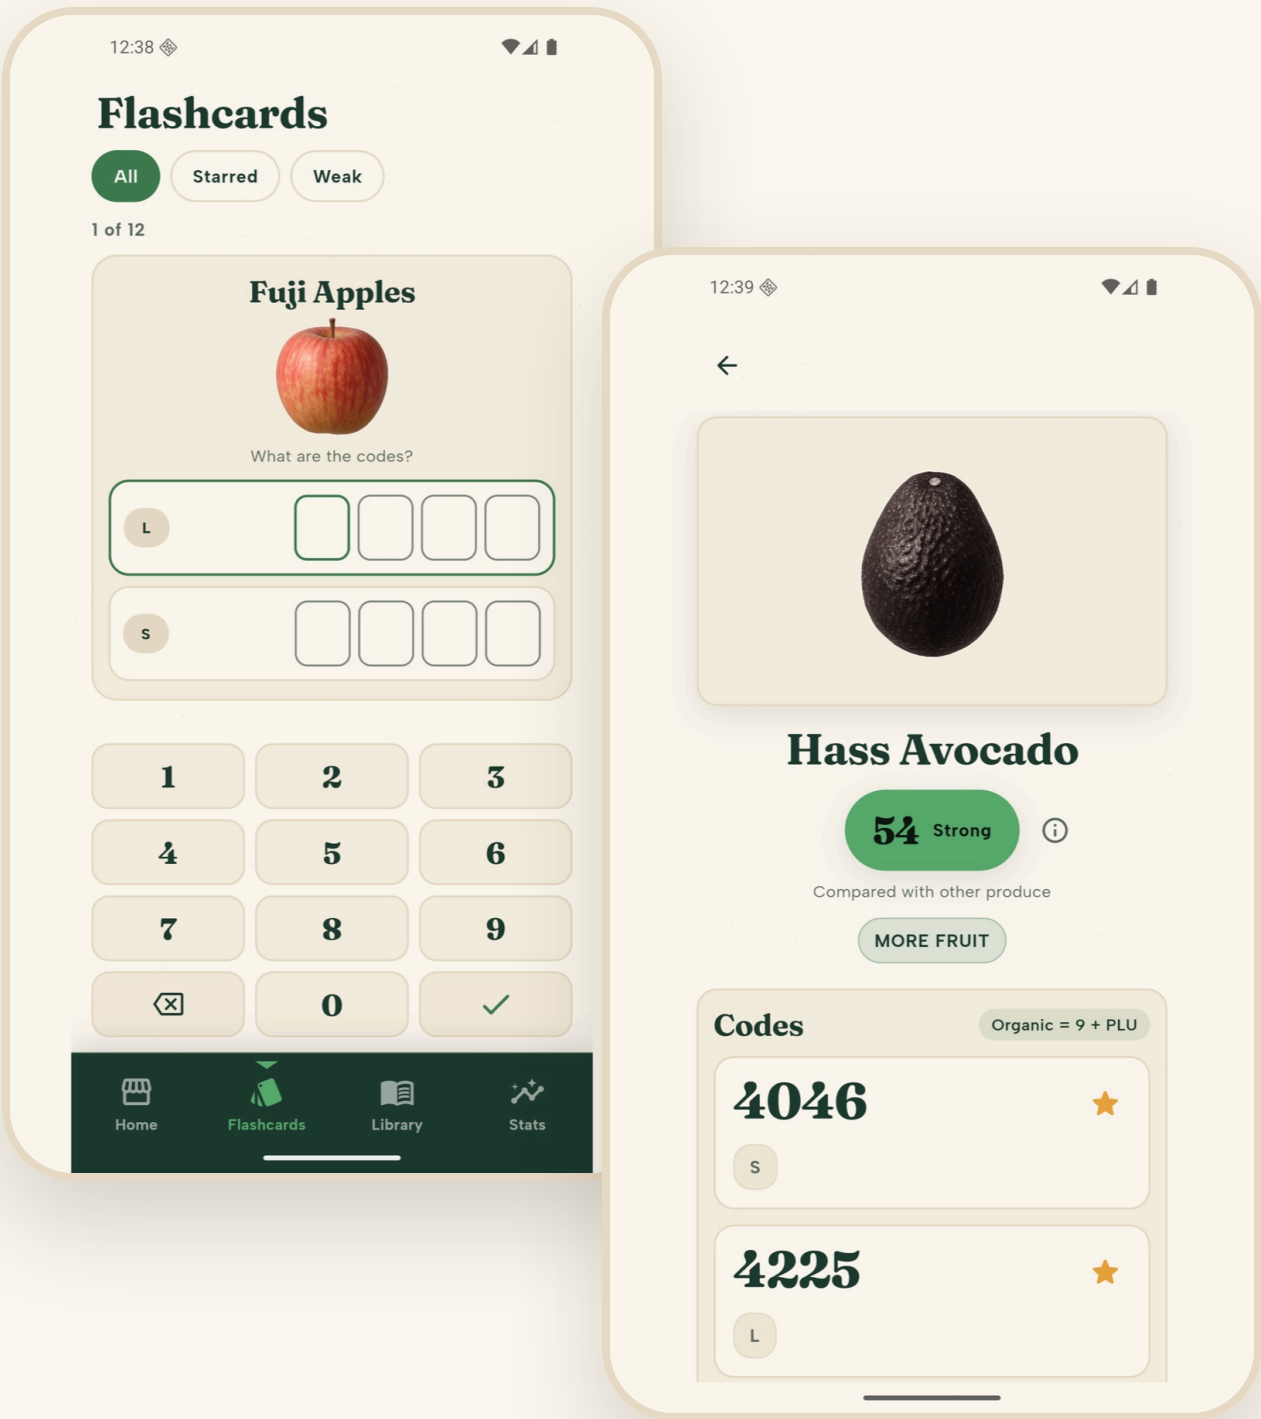

Most common first

The 120 most common items come first, in ten levels. An item with several sizes starts with its most common size.

Lookalikes side by side

Contrast after a miss

After a mix-up between two sizes or two varieties, PLUed shows both codes together, then asks again.

Then it builds speed at the register.

Knowing a code and ringing it quickly are two skills. On The Belt, produce moves past on a timer and the cashier types each code.

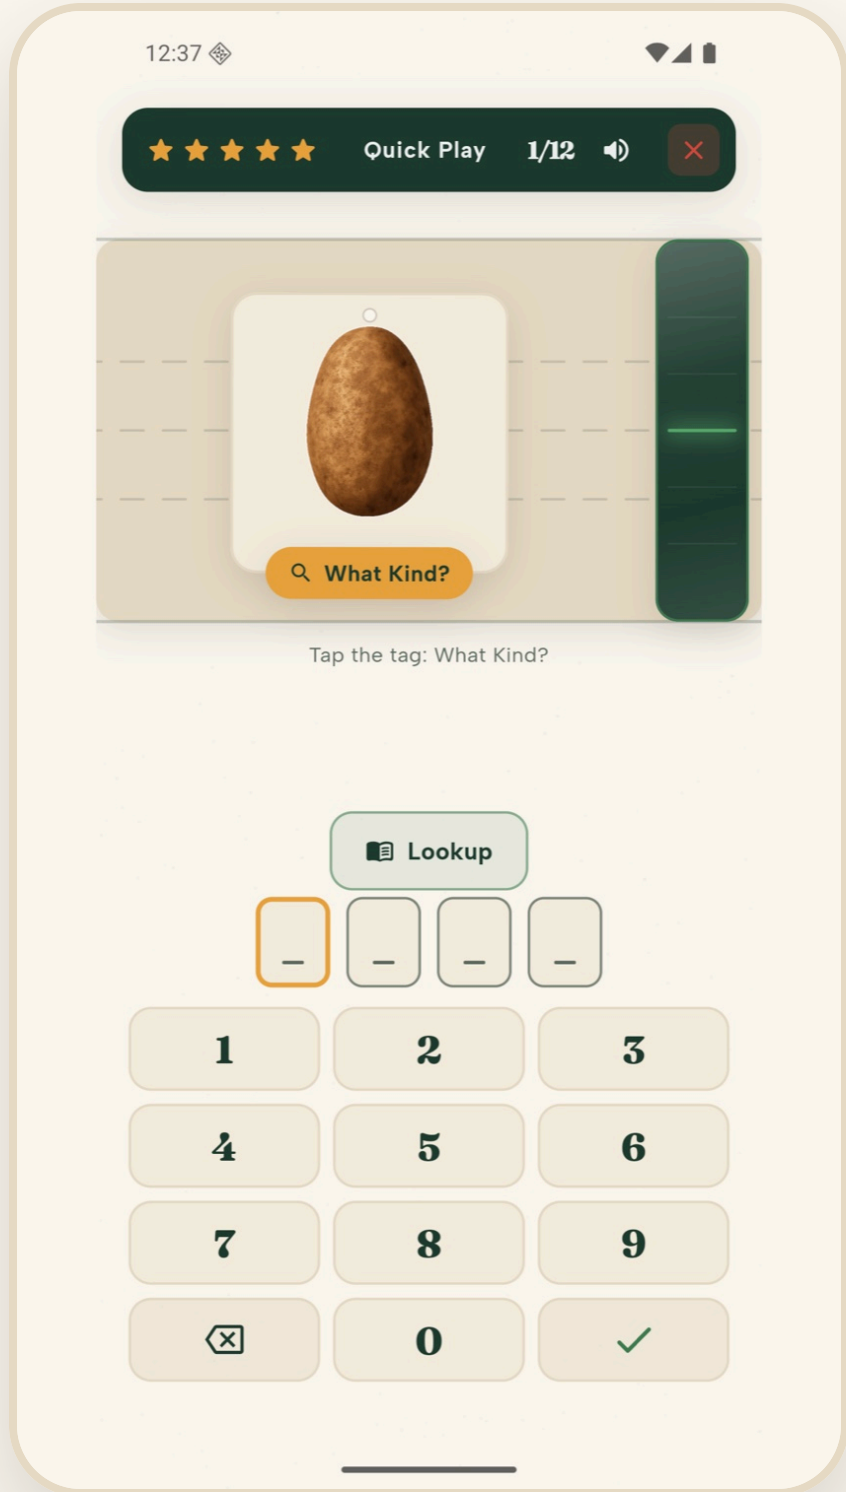

Items per minute. Each cashier sees their own speed, session by session.

A lookup costs time. A code they looked up has to be typed again, and it never counts as a fast answer.

Ten minutes a day. Short sessions and a daily streak, with a reminder to stop after fifteen minutes.

English · Español

The whole app, all 1,087 produce names and the coaching, in English or Spanish. Each cashier chooses.

Every standard code is already in.

PLUed comes with 1,087 produce items, each with its picture and every size and region code. They are all in the Library, where anyone can search by name or by code. Your team can start the day they install it.

A Store Pack is optional. Build one for your own house codes, or to keep practice to what you carry.

1 Upload the list you already have.

A spreadsheet, or typed in. No account.

2 PLUed matches each item to its picture.

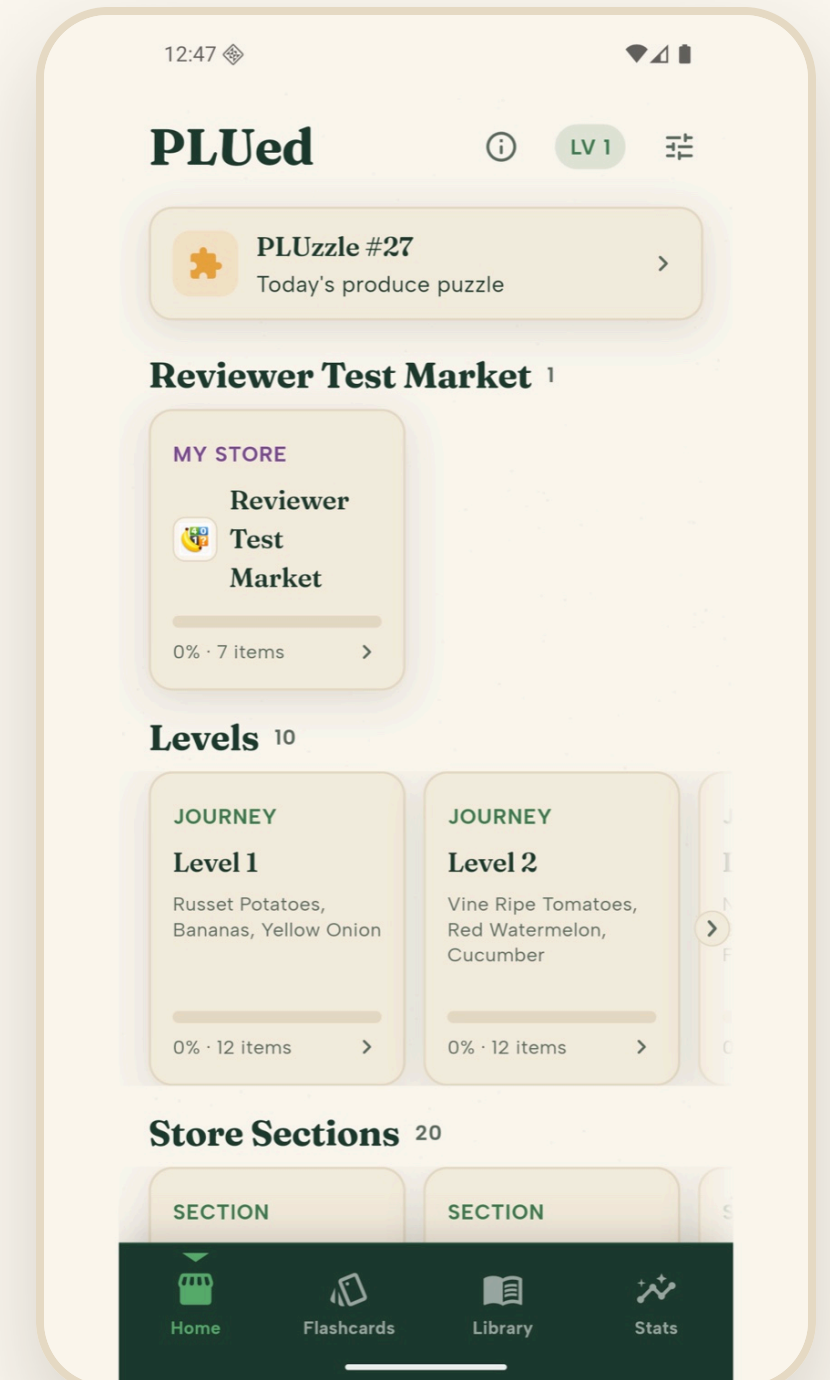

It reads each name and picks from more than 1,000 pictures. You check the matches and swap any you like.

3 Share one link or QR code.

One scan puts your codes, pictures and logo in every cashier's app.

Build a pack, free: plued.app/pack

Step-by-step guide: plued.app/trainers

One store code unlocks every cashier.

A Store Plan is one yearly plan per store. Choose the size that fits your front end:

	10	25	50	100
up to	cashiers	cashiers	cashiers	cashiers

How it works

1. Buy the plan. Your store code arrives on screen and by email.
2. Post the store code in the break room.
3. Each cashier enters it once. That phone stays unlocked, even if you do not renew.

What the plan includes

- Your store's codes, curated and maintained by us
- Your logo in every cashier's app
- New produce pictures on request
- A private store page: seats used, your pack, your plan

See plans and prices: plued.app/store

Several stores, or need an invoice? The same page has a form.

Free for your shoppers, too.

Scan a sticker Point the camera at a produce sticker to see what it is.

The Library Every item with its picture and codes. Search by name or by code, and open your store's pack.

Nutrition score Each item gets a score from 0 to 99 for how rich in nutrients it is. The score is PLUed's own, built from USDA data. How it is calculated:
plued.app/methodology

Build a plate Pick a few items and see the plate's score, its calories and what would raise it.

What they notice first: a faster line, because your cashiers know the codes.

A shopper picks "I'm shopping" when the app first opens. No account, nothing to buy. English or Spanish.

See plans and prices for your store.

plued.app/store

Pick a size, pay by card, and your store code arrives on screen and by email. For several stores or an invoice, the same page has a form.
